# The Problem

## Nigeria's Food Security Is at Risk

### Social

- 35 million Nigerians face acute food insecurity (Source: UN World Food Programme).
- Smallholder, women and youth farmers remain under-supported.
- Land use conflict limits safe and productive access to farmlands.

### Economic

- Limited access to finance and income generation knowhow for self-sufficiency.
- Rural communities are disconnected from markets and value chains.
- Weak infrastructure exacerbating post-harvest losses and low income.

### Environmental

- Climate change is degrading the soil and reducing yields.
- Farmers lack real-time soil and climate data.
- Limited adoption of climate-resilient, conservation agriculture.

# EverGreen Solution

## Our Focus Areas

### Sustainable & Climate Resilient Agriculture

- Apply **technology** to provide farmers climate and soil data.
- Enable farmers to use real-time data for conservation and **precision agriculture**.
- Translate related **policies** into practical benefits for farmers.

### Nutrition & Food Systems

- Integrate **nutrition-sensitive** practices into the value chain.
- Enhance WASH and food hygiene practices to improve **food safety**.
- **Advocate** for more targeted support for smallholder farmers (SHFs) especially women and youth.

### Market Systems Development

- **Map the value chain** of selected cash crops.
- Support smallholder farmers to develop sustainable and profitable **market links**
- Collaborate to drive innovation and implement **scalable solutions** to the market challenges of SHFs.

**Inclusive Capacity Strengthening | Results-Focused Monitoring**

# EverGreen Impact

## Our Growing Footprint: Nasarawa State, 2025

**100+** farmers engaged in baseline assessment and training.

**35%** youth & women participation across initiatives.

**3** community-driven initiatives co-created.

Sustainability integrated into all program design.

## Our Growing Partnerships and Affiliations:

# EverGreen 3-Year Pathway

North-Central Nigeria, 2025-2027

**2025**

## **Foundation**

- Reached 100+ farmers in Nasarawa State.
- Baseline data, needs assessment, and training.

**2026**

## **Expansion**

- Reach 500+ farmers across Nasarawa State & FCT Abuja.
- Technology-enabled baseline and endline assessment.
- Precision farming + nutrition-sensitive programming.

**2027**

## **Scale**

- Reach 2,000+ farmers across North-Central Nigeria.
- Scale technological assessment for precision, nutrition-sensitive programs.
- + market solutions for major agricultural value chains.

# Alignment with UN Sustainable Development Goals

## End Poverty & Improve Nutrition

Supporting food and nutrition security for all.

## Empowering Women

33% women and 33% youth engagement in our program design.

## Financial Freedom

Promoting income generation that sustains communities and boost the national economy.

## Environmental Protection

Prioritising conservative and regenerative approaches.

## Together for a Sustainable Future

Centering all programs on participatory partnerships and cross-sector collaboration.

EVERGREEN

# Areas of Collaboration

## Financing:

Direct funding for programs based on a robust monitoring framework.

## Agricultural Inputs:

Supply or subsidize quality inputs to smallholder farmers.

## Technical:

Technical collaboration to improve food and nutrition outcomes (including via capacity building), and achieve shared goals.

## Technology:

Leverage technology to co-develop value chain solutions.

## Market Development:

Build or facilitate market systems and market linkages such as off-take agreements..

## Advocacy:

Stakeholder engagement for advocacy and communication

# EverGreen: Your High-Value Partner

## Community & Sustainability centred

As a **grassroots NGO**, we design initiatives with communities based on their priorities and greatest needs. This collaborative approach **empowers communities** to co-own initiatives, drive solutions, and sustain related impacts.

## Technology-enabled for Scalability

Technology is at the core of our initiatives to deliver **real-time insights** on soil, crops, and performance for farmers and other stakeholders, and a strong platform for **strategically scaling our solutions** to benefit more communities..

## Robust Governance & Execution team

With a **strong governing board** of trustees and advisory board, and a **multidisciplinary strategy and execution team**, EverGreen is built to make sound decisions, execute effectively, and deliver valuable, scalable impact.

## Results-focused M&E

Monitoring matters. We apply good practice standards to **track the social, economic, and environmental value** of our work focusing on the most material impacts to our stakeholders.

# Thank You!
