Vision 2030: A nourished Nigeria sustained by a resilient food system that ensures safe, equitable nutrition for all.

Transforming Africa's Food Systems Through **Soil Intelligence, Food Systems Strengthening, and Market Access**

Every year, millions of Nigerian smallholder farmers make critical farming decisions without reliable soil data, resulting in lower yields, reduced incomes, poor nutrition outcomes, and environmental degradation.

EverGreen equips farmers with data-driven soil intelligence, nutrition-sensitive agriculture, and market connections that improve productivity, resilience, and food security.

FCT Abuja
Benue State
Nasarawa State

400+ farmers reached
30% youth & women participation

500ha of farmland surveyed
2000 soil data points collected
100MT offtake agreements for export
Sustainability and M&E program integration

We welcome your partnership to scale our reach and impact

THE PROBLEM

Nigeria's food security is at risk.

35M

Nigerians face acute food insecurity — while smallholder, women and youth farmers remain under-supported.

Source: UN World Food Programme

Social

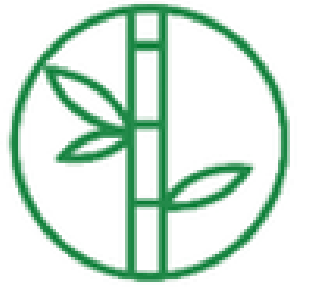

- 32% of children under five are stunted (Unicef).
- Smallholder, women and youth farmers remain under-supported.
- Land use conflict limits safe and productive access to farmlands.

Economic

- Poor access to finance and income generation knowhow.
- Limited direct connection of farmers to main markets.
- 40% post-harvest produce loss costing ₦3.5 trillion annually (Business Day Nigeria).

Environmental

- Soil degradation and inefficient fertilizer use.
- Limited access to reliable soil data.
- Low adoption of conservation agriculture.

OUR FOCUS AREAS

Sustainably strengthening Nigeria's food systems.

Sustainable & Climate Resilient Agriculture

- Real-time climate & soil data
- Precision & conservation agriculture
- Contribute to and operationalize policies.

Nutrition & Food Systems

- Nutrition-sensitive value chains
- WASH & food hygiene for better food safety
- Targeted support for women & youth smallholders.

Market Systems Development

- Map cash-crop value chains
- Profitable market linkages
- Scalable solutions for smallholders

OUR PEOPLE

- Strong governing board of trustees
- Advisory board with over 40 years' cumulative experience
- Multidisciplinary strategy and execution team
- Expertise includes agricultural science and technology, conservation agriculture, agribusiness services, food security and livelihoods, market systems, MERL, nutrition, supply chain, policy and advocacy

OUR SOLUTION. TWO FLAGSHIP INITIATIVES

Where technology & innovation meets the market.

ENSIP

Nutrition & Soil Intelligence Program

Land assessment + Drone Survey + Lab Analysis = AI-Powered Agritech SaaS + Data Intelligence Platform for smarter farming.

Transforms soil data into practical, farm-level intelligence that maximizes productivity, profitability, and sustainability

ADDRESSABLE MARKET: 70M ha of Nigerian farmland lacking structured soil intelligence

VALUE PROPOSITION

- Carbon credit analytics
- Soil texture data and fertility index
- Soil-crop compatibility classification
- Targeted recommendations and advisory
- Precision agriculture, optimized productivity

THE ENSIP ADVANTAGE

- Proprietary technology/data
- Low-cost equity models for inclusion
- Nutrition integration
- Government-aligned data infrastructure
- Climate-smart, conservative agriculture focus

EMSD

Market Systems Development

Need-based market strengthening strategies + digital marketplace = Better harvest quantity, quality, and farmer revenue, reduced post-harvest losses, better food security.

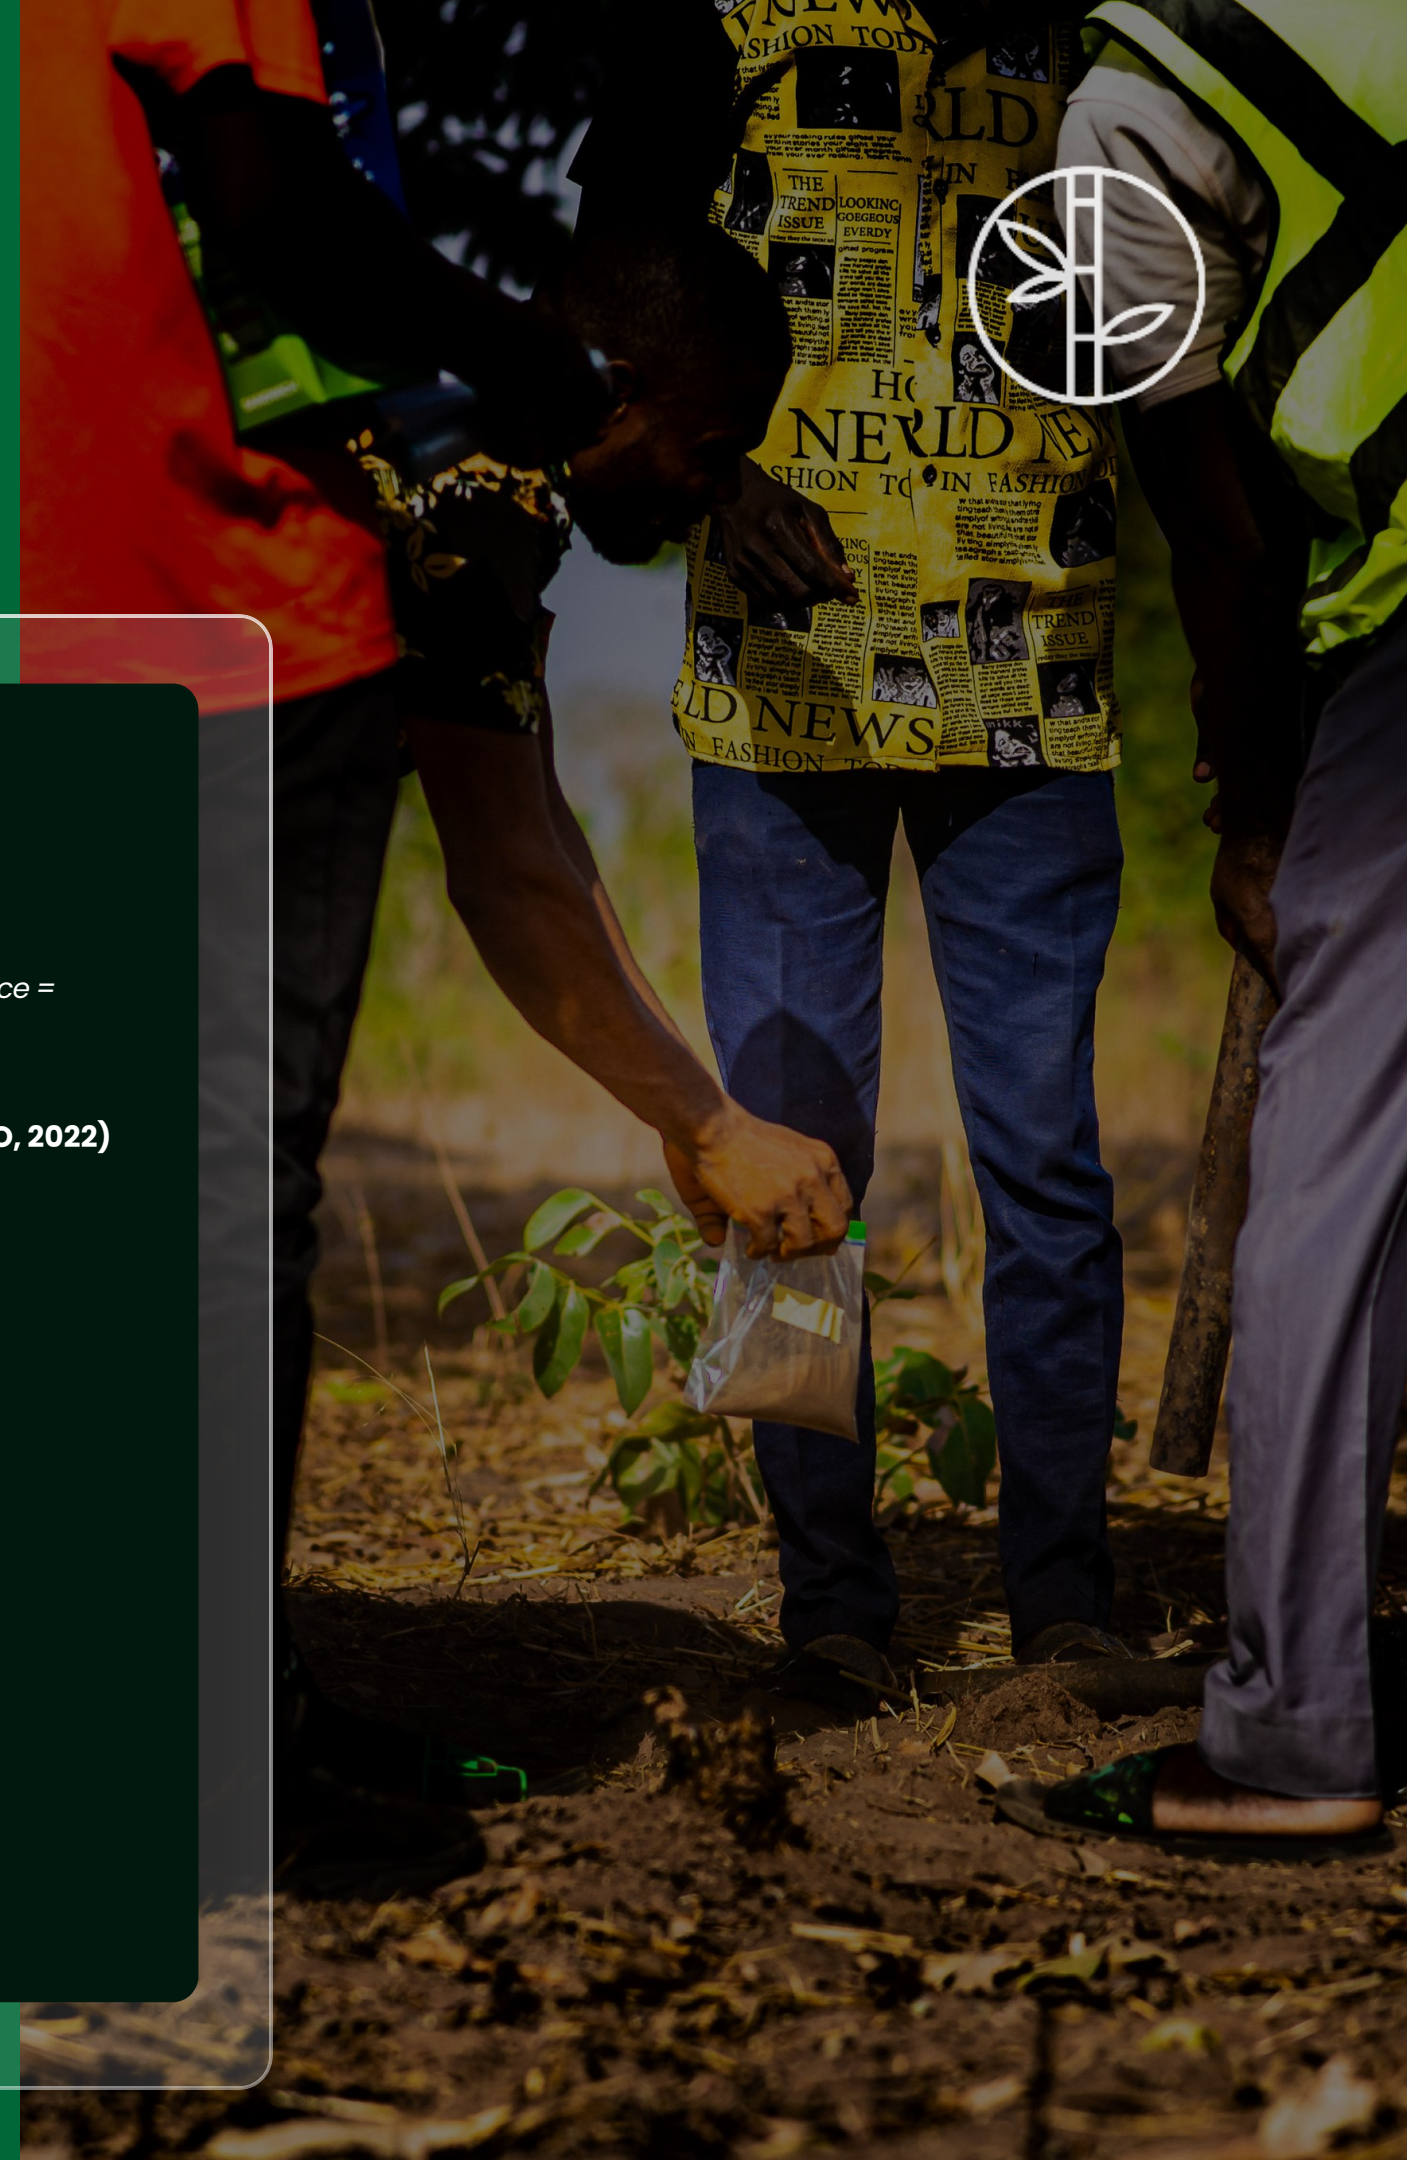

ADDRESSABLE MARKET: \$10BN post-harvest loss (FAO, 2022)

VALUE PROPOSITION

- Targeted value chain mapping & development
- Farmer aggregation, traceability & QA
- Production & processing partnerships
- Export facilitation & certification
- Agribusiness training & advisory

THE EMSD ADVANTAGE

- Structured market access
- Robust Quality Management System
- Financial / business readiness
- Export readiness
- EverGreen Marketplace platform

RESULTS - 2024 TO DATE

Proof in the field, not on paper.

NASARAWA CARES

3-YEAR GROWTH PLAN · BEYOND NIGERIA

From building to scale, 2026-2028.

PHASE 1

2026 – 2027

Building

- Survey 1,000ha for soil fertility & texture
- Launch Soil Intelligence Platform; integrate data to Nigerian Soil Information System (NiSIS)
- Sensitization and advisory to 1,000 farmers
- EMSD offtake for 200 MT export produce

PHASE 2

2027 – 2028

Expansion

- Scale tech assessment to a 5,000 ha soil atlas
- Advisory to 5,000 farmers
- 1,000 MT offtake export produce
- Launch EverGreen Marketplace platform
- Digital first-mile crop mapping

1000 → 5,000 ha

land survey

1,000 → 5,000

farmer reach

200 → 1,000 MT

export offtake volume

Let's build Africa's food future together.

EverGreen combines data, nutrition, and market access to help smallholder farmers increase productivity, improve livelihoods, and strengthen food security.

We are seeking donors, development partners, corporate collaborators, and impact investors to scale proven solutions across Nigeria and beyond.

Our technological MVPs are available for demonstration.
