Malnutrition Amidst Agricultural Wealth in Nigeria

VAST AGRICULTURAL POTENTIAL

34 m ha

under cultivation, out of 70.8 m ha of agricultural land

~20 M

people in the agricultural workforce

Major public & private investment this decade

YET MILLIONS FACE FOOD & NUTRITION INSECURITY

- Undernutrition contributes significantly to child mortality
- Food insecurity and undernourishment have risen over recent decades
- FAO and WFP warn of worsening food insecurity in Nigeria in 2026

THE CHALLENGE STARTS FROM INTELLIGENCE

Poor understanding of soil health, nutrients, crop suitability, climate risk and land management keeps farm potential from becoming nutritious food, prosperity or food security.

From Soil Health to Human Health

EverGreen Soil and Crop Intelligence transforms data into productivity for farmers, agribusiness, development programmes and institutions.

Good Soil › **Good Crop** › **Good Health** › **Good Profit**

- Diagnose soil health accurately
- Optimise nutrient management
- Increase productivity and profitability
- Match the right crop to the right land
- Improve crop quality and nutritional outcomes
- Build climate-smart and resilient farming systems

EVERGREEN SOIL AND CROP INTELLIGENCE

TIER 1

Soil Health Data

Know your soil. Grow more. Earn more.

- Soil sampling & testing
- Soil GIS mapping
- pH, NPK & salinity analysis

From **₦33,000** per soil sample

TIER 2

Soil Data & Crop Specification

Match the right soil to the right crop.

- Everything in Tier 1
- Soil-crop compatibility assessment
- Climate data

From **₦79,000**
for 3 samples per ha

TIER 3

Soil Data, Crop Specification & Consultation

Agronomic intelligence & expert advisory.

- Everything in Tier 2
- Carbon analytics
- Remediation strategy
- On-farm advisory*

From **₦94,000**
for 3 samples per ha

**Premium advisory on request at a discounted custom price*

WHY EVERGREEN

- **Science-driven**
- **Practical recommendations**
- **Expert on-farm advisory**
- **Climate-smart & precise**
- **Yield, profit & nutrition**
